

The Bambino Bottled Water Pump 220V is a convenient way to get water to your espresso machine or any appliance that requires water where mains water isn't available. Utilising office water containers the Bambino bottled water pump has a unique cap that fits tightly on the neck of the bottled water. The suction wand incorporates an automatic shut off valve in case the bottles runs out of water. this safety feature protects your expensive equipment from running dry.

The New and improved Bottled Water PLUS is part of Bambino's premium water dispensing product line. When a water bottle is connected to the system, fresh water is available for use with coffee/tea machines, water dispensers, refrigerators, ice makers, or any other application where portable potable water is needed. The Bottled Water PLUS system is also designed for convenience-the pump shuts off when the water source is depleted, and when water is restored, the pump will automatically restart. This eliminates the chance of any damage to the appliance running dry.
